

NATIONAL INSTITUTE FOR HEALTH AND CARE EXCELLENCE

Equality and health inequalities assessment (EHIA)

Appendix A: equality and health inequalities assessment (EHIA)

2023 exceptional surveillance of thyroid disease: assessment and management (NICE guideline NG145)

STAGE 1. Surveillance review

Date of surveillance review: October 2023

Focus of surveillance review: potential for biotin to interfere with the results of thyroid function tests

Exceptional review

1.1 On reviewing the existing EIA or EHIA and issues log for the guideline(s), describe below any equality and health inequalities issues relevant to the current surveillance review

No issue identified from the [existing EIA from 2019](#).

1.2 Did you identify any equality and health inequalities issues through initial intelligence gathering (for example, national policy documents, topic expert/patient group feedback, evidence searches, implementation data)?

No issues identified

1.3 If you have consulted stakeholders or topic experts, what questions did you ask about equality and health inequalities issues?

Stakeholders and topic experts were not consulted.

1.4 What equality and health inequalities issues have been identified during this surveillance review and what was the impact on the current review and outcome decision? [If an update is proposed, include information in the update and outcomes plan]

No equality and health inequalities identified during this surveillance review.

Completed by surveillance reviewer: RM, technical analyst
