

[virus checked]

Dear Chris

Thank you for the opportunity to comment on the draft Assessment Report for :
'Routine antenatal anti-D prophylaxis for RhD-negative women (review)'
The document is welcome and there are very few comments to be made.
However, there is ambiguity in Table 8 on page 47 in which the display of data
does not quite match with the text about it (last paragraph on page 46 and
spreading onto page 47). The attached page provides a suggested replacement to
Table 8 which is much clearer.

If you have any questions please contact me.

Kind regards
